-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

1. Claims 21-29 are pending.

Election/Restrictions

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits

Claim 21 is generic to a plurality of disclosed patentably distinct species comprising methods of diagnosing the presence of a tumor in mammal by determining the level of expression of a gene encoding the polypeptide shown as SEQ ID NO:22 in a test sample of tissue cells. The species are as follows: (a) determining the level of expression of the gene using an oligonucleotide in an in situ hybridization analysis (claim 22); (b) determining the level of expression of the gene using an oligonucleotide in an RT-PCR analysis (claim 22); (c) determining the level of expression of the gene using an antibody in an immunohistochemistry analysis (claim 23); (d) determining the level of expression of the gene using an antibody in a western blot analysis (claim 23). The methods are patentably distinct because they are directed to the use of structurally distinct reagents with different mechanisms of action.

Claim 21 is generic to a plurality of disclosed patentably distinct species comprising methods of diagnosing the presence of a tumor in mammal by determining the level of expression of a gene encoding the polypeptide shown as SEQ ID NO:22 in a test sample of tissue cells. The species are as follows: (a) samples are obtained from brain tissue (claim 25); (b) samples are obtained from bone tissue (claim 26); (c) samples are obtained from colon tissue (claim 27); (d) samples are obtained from kidney tissue (claim 28); (e) samples are obtained from pancreatic tissue (claim 25). The methods are patentably distinct because they are directed to the detection of different diseases with different etiologies and pathologies.

3. Upon the allowance of a generic claim, applicant will be entitled to consideration

Art Unit: 1642

of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

4. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 of the other invention.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
